TROTEC-FIRST PRODUCTION STANDARD

Unless a product is explicitly marked as a specialty blank or print substrate, laserable sheet materials are specified from Trotec families such as TroLase, TroLase Thin, TroGlass and TroCraft. Engraving is material-native and one-colour: white reveal on black/white laminate, black reveal on metallic laminate, frosted engraving on clear acrylic and dark burn on wood.

MATERIALS & FINISHES

The visible finish matters as much as the design. Our laser catalog is Trotec-first so material behaviour, engraving contrast and repeatability stay predictable.

TroLase / engraving laminate

Black/white and metallic face materials for room signs, nameplates and durable identification.

TroLase Thin

Thin metallic-look laminate for badges, tags, phone medallions and premium small-format details.

TroGlass acrylic

Clear, frosted and colour acrylic for plaques, awards, stands, layered signs and fabricated displays.

TroCraft / wood families

Natural-looking sheet materials for selected displays, ornaments and low-volume branded pieces.

Specialty blanks

Cutting boards, leatherette trays, knives, boxes and other gift blanks are sourced separately and clearly identified.

Print substrates

Foam board, coroplast, ACP, banner and other print media are specified per commercial print project.
